REMARKS**Restriction/Election**

The Examiner has required restriction to one of the following inventions under 35 U.S.C. 121:

- I. Claims 1-10 and 17 drawn to products of the formula (I), classified in various subclasses of classes 514, 546 and 548.
- II. Claims 11-16 drawn to methods of use for the compounds of formula (I) classified in various subclasses of class 514.

Furthermore the restriction requirement requires that when the election of one of Groups I is made, an election of a single compound is further required including an exact definition of each substitution on the base molecule (Formula (I)), wherein a single member of each substituent group or moiety is selected.

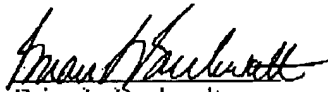

Applicants elect Group I, drawn to products of the formula I, without traverse. Claims 11-16 have been canceled herein; however, Applicants reserve the right to re-introduce claims 11-16 into a subsequent divisional application. In compliance with the requirement to elect a species, Applicants elect compound 40 in Table 1 (which also can be found in example 24) without traverse.
